

Business Productivity Online Deskless Worker Suite

Microsoft Business Productivity Online Deskless Worker Suite provides just the right amount of access to email, calendar, and team portals for only \$3 per user per month. Designed to work with full-featured business productivity services, Deskless Suite includes Microsoft Exchange Online Deskless Worker and Microsoft SharePoint Online Deskless Worker, which deliver basic access to messaging and collaboration tools for workers who don't require more.

Suite includes:

- A 500-megabyte (MB) mailbox for email, calendar, and contacts.
- Antivirus and anti-spam filters.
- Read-only access to SharePoint portals and the capability to fill out forms.
- 99.9% target service availability.

More information

Deskless Worker Suite is the business productivity solution that complements [Business Productivity Online Standard Suite](#) and gives your organization the flexibility to extend services affordably. For example, if your company provides Microsoft SharePoint Online to your content managers, who need its full content-management capabilities, you can deploy Business Productivity Online Deskless Worker to the workers who simply need read-only access to the SharePoint site.

Suite includes:

- Exchange Online Deskless Worker.
- SharePoint Online Deskless Worker.
